

Ben Lewis

“My work has provided many opportunities for travel both within Australia and internationally, including India and the US.”

Ben Lewis is a Mechanical/Electrical Engineer with ASEMA International (Engineering Consulting Firm).

“My role in this company is primarily as a machine designer. The work is challenging, provides a lot of variety, often involves the use of high end technology and is always interesting.

“I obtained this position shortly after completing my Bachelors degree five years ago. I was looking for a role as a machine designer and obtained this position because I had the necessary qualifications and experience.”

Ben completed the Bachelor of Engineering (Mechanical/Electrical) at the University of Ballarat in 2001.

“At the University of Ballarat, the lecturers are extremely helpful and genuinely interested in your education. There were many times when I was given one-on-one attention, which I believe had a very positive impact on my learning.

“My education at the University of Ballarat has given me some wonderful opportunities that otherwise would not have been possible.”
